Lorentz-Breaking Field Theory

Message from the Guest Editor

The possibility of Lorentz and/or CPT symmetry breaking began to be intensively discussed about thirty years ago. There are numerous factors that have called attention to such studies. First, any physical theory, including special and general relativity, should have some limits of applicability, which clearly establish the question of their determination. In particular, such an interest has been supported by studies of elementary particles, where the violation of various symmetries, for example, CP-symmetry, for certain processes has been proved. [...] For more information, please visit [link](#).

About the Journal

Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

Editor-in-Chief

Prof. Dr. Lorenzo Iorio
Ministero dell' Istruzione e del Merito, Viale Unità di Italia 68, 70125 Bari,
Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
