

Special Issue

Recent Progress in Relativistic Astrophysics

Message from the Guest Editors

It is a pleasure to announce the Special Issue "Recent Progress in Relativistic Astrophysics". Black holes and neutron stars are the most extreme objects that can be found in the Universe and an ideal laboratory for testing fundamental physics. Thanks to new observations facilities, in the past 20 years there has been tremendous progress in the understanding of these objects and of their astrophysical environment. Recent detections of gravitational waves have opened a new and complementary window to the study of compact objects. While some questions have been addressed, others are still open, and new questions have arisen. The aim of this Special Issue is to review recent progress in the field of relativistic astrophysics and to point out future directions. [...] For more information, please visit [link](#).

About the Journal

Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

Editor-in-Chief

Prof. Dr. Lorenzo Iorio
Ministero dell' Istruzione e del Merito, Viale Unità di Italia 68, 70125 Bari,
Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
