closed (28 September 2018)

Message from the Guest Editors

Dear Colleagues,

Cities are constantly growing, overloaded by images and inputs, and the areas between urban and rural environments are left to change without clear visions, the relationships between human beings and nature are always more hidden and complicated, natural areas are disappearing or have been transformed in protected untouchable open-air museums, even sustainability itself seems at times to already be an old fashion trend, while the rhythm of our life is increasing constantly.

In this context, what is the new meaning of landscape and how are human beings creating new relationships with nature? As the poet Antonio Machado noted, “there are no paths, paths are made by walking” and this conference will try to answer these questions defining the landscape as social, economic, political, artistic, design, historic, and theoretical products of its own era and identifying its transformations, from the past to the future.

Message from the Editor-in-Chief

Urban Science is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the length of the papers.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#) and [other databases](#).

Journal Rank: CiteScore - Q1 (*Urban Studies*)
