

Special Issue

Urban Tourism and Hospitality: Communities, Culture, and Sustainability

Message from the Guest Editors

Urban tourism and hospitality management have become increasingly important in shaping sustainable, resilient, and inclusive cities. As urban areas attract a growing share of global travellers, the intersection of tourism and hospitality with urban planning, governance, culture, and technology is gaining prominence. This Special Issue seeks to explore the opportunities and challenges posed by urban tourism, focusing on how destinations can balance economic growth with sustainability, local community well-being, and cultural preservation. Contributions that examine the role of innovation, digitalization, and smart technologies in reshaping urban experiences are encouraged, as are studies addressing issues such as overtourism, environmental pressures, and social inclusion. We particularly welcome interdisciplinary research that integrates perspectives from tourism studies, hospitality management, urban planning, and sustainability science. We look forward to receiving your original research articles and reviews.

About the Journal

Message from the Editor-in-Chief

Urban Science is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Luis Hernández-Callejo

Department of Agricultural and Forestry Engineering, University of Valladolid, Campus Duques de Soria, 42004 Soria, Spain
