

Special Issue

Sustainable Solutions for Urban Wastewater Management and Resource Utilization

Message from the Guest Editors

- Wastewater treatment is a critical aspect of sustainable urban development. As urban populations continue to grow, the volume of wastewater generated will increase, posing challenges for both infrastructure and the environment. Additionally, climate change exacerbates these challenges by affecting water availability and quality, making efficient wastewater management even more crucial.
- The aim of this Special Issue is to explore innovative solutions for urban wastewater treatment and resource recovery. By focusing on cutting-edge research and practical applications, this Special Issue seeks to highlight the potential for transforming wastewater into valuable resources such as biogas, fertilizers, and clean water. This subject aligns with the scope of the *Urban Science* journal, which emphasizes interdisciplinary research and sustainable urban development. By addressing the challenges and opportunities in urban wastewater management, this Special Issue will contribute to the journal's mission of advancing knowledge and solutions for sustainable urban living.
- We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Urban Science is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Luis Hernández-Callejo

Department of Agricultural and Forestry Engineering, University of Valladolid, Campus Duques de Soria, 42004 Soria, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science) and other databases.

Journal Rank:

JCR - Q1 (Geography) / CiteScore - Q1 (Urban Studies)
