

## Special Issue

# Urban Green Space and Health

### Message from the Guest Editors

This Special Issue welcomes interdisciplinary contributions that explore how UGS affects health outcomes across diverse populations and geographies. It invites research, reviews, and case studies that investigate the following issues: The physical and psychological health benefits of green space access and exposure;

Equitable distribution of UGS and its implications for health disparities;

Planning and design strategies for inclusive, accessible, and health-promoting green environments;

The role of green spaces in climate adaptation and environmental resilience, as well as their health co-benefits;

Community engagement, governance, and cultural perspectives in shaping UGS and health outcomes; Innovative methodologies for assessing the health impacts of green spaces.

This Special Issue welcomes contributions from the fields of urban planning, public health, environmental psychology, landscape architecture, geography, and related disciplines.

## About the Journal

### Message from the Editor-in-Chief

*Urban Science* is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the maximum length of the papers.
