

Special Issue

Innovative Transportation Systems: Shaping Smart and Sustainable Urban Mobility

Message from the Guest Editors

This Special Issue focuses on innovative systems such as Urban Air Mobility and Cooperative Connected Automated Mobility, alongside intelligent and smart transportation technologies designed to enhance sustainability and efficiency. The Special Issue also investigates the integration of emerging technologies with urban infrastructure and sustainable development, offering insights into how these systems can be seamlessly incorporated into existing transportation networks. In addition, the issue examines broader smart transportation solutions that address environmental and social challenges. It explores how advanced digital technologies can optimize multimodal transport systems, creating seamless, efficient, and user-friendly mobility options while reducing environmental impacts. By aligning these innovations with global sustainability goals, the issue highlights strategies to foster equitable access to mobility and promote the development of inclusive and sustainable urban spaces.

About the Journal

Message from the Editor-in-Chief

Urban Science is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Luis Hernández-Callejo

Department of Agricultural and Forestry Engineering, University of Valladolid, Campus Duques de Soria, 42004 Soria, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science) and other databases.

Journal Rank:

JCR - Q1 (Geography) / CiteScore - Q1 (Urban Studies)
