

Special Issue

Climate Change and Sustainable City Design

Message from the Guest Editor

This Special Issue aims to publish original research articles, case studies, and review articles that examine how sustainable city design enables, facilitates, and supports the design and implementation of climate action, and we are particularly interested in the creative and innovative strategies currently being implemented by cities to address the climate crisis. Research areas may include, but are not limited to, the following topics: Multimodal public transportation;

-

- Multimodal public transportation;
- Urban/local (or community based) food–energy–water systems and building community resilience;
- Creative and innovative climate adaptation strategies;
- Green infrastructure;
- Energy efficient buildings;
- Decentralized renewable energy (community-based solar and micro-grids);
- Transit-oriented development;
- How certain urban design strategies and programs help withstand or recover better from climate disasters;
- Walkable and bikeable cities;
- Climate justice initiatives to protect vulnerable community members.

About the Journal

Message from the Editor-in-Chief

Urban Science is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Luis Hernández-Callejo

Department of Agricultural and Forestry Engineering, University of Valladolid, Campus Duques de Soria, 42004 Soria, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science) and other databases.

Journal Rank:

JCR - Q1 (Geography) / CiteScore - Q1 (Urban Studies)
