Enhancing Urban Sustainability and Well-Being in Developing Regions Facing Climate Change Impacts and Economic Constraints

Message from the Guest Editor

In recent years, the rapid urbanization of developing regions has been accompanied by significant challenges related to climate change including urban heat island and economic constraints. Urban areas in these regions often face severe impacts from climate-related events such as heatwaves, flooding, and storms, exacerbating existing socio-economic vulnerabilities. The urgency to enhance urban sustainability and well-being in these contexts has never been more pronounced. This Special Issue seeks to explore innovative strategies and practices that can enhance urban sustainability and well-being in developing regions. By focusing on areas particularly vulnerable to climate change and economic limitations, we aim to contribute to the broader discourse on urban resilience and sustainability. The scope of this Special Issue aligns with the journal's commitment to advancing knowledge of urban studies, environmental sustainability, and socio-economic development. We invite researchers to submit original research articles and comprehensive reviews that offer novel insights about and practical approaches to overcome these pressing challenges.

About the Journal

Message from the Editor-in-Chief

Urban Science is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Luis Hernández-Callejo

Department of Agricultural and Forestry Engineering, University of Valladolid, Campus Duques de Soria, 42004 Soria, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science) and other databases.

Journal Rank:

JCR - Q1 (Geography) / CiteScore - Q1 (Urban Studies)
