

## Special Issue

# Remote Sensing for Urban Environment Analysis

### Message from the Guest Editors

In the past few decades, cities have experienced explosive growth in both natural size and population, which is posing serious challenges regarding the ecological and environmental function of cities. Rapid urbanization has caused massive undesirable social-economic and eco-environmental problems, such as environmental pollution, urban heat island, energy shortage, population migration, social welfare and so on. Therefore, the world needs scientific knowledge to reduce these risks and meet the Sustainable Development Goals (SDGs) under the context of global climate change. Urban remote sensing has been evolving consistently over the last fifty years. Key contributions of urban remote sensing include, but are not limited to, the characterization of urban areas, urban land cover changes, human activities and thermal remote sensing of urban climates.

### Guest Editors

Dr. Junfu Fan

Dr. Chaobin Yang

Dr. Wenjie Zhang

### Deadline for manuscript submissions

closed (31 October 2023)

## About the Journal

### Message from the Editor-in-Chief

*Urban Science* is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the maximum length of the papers.

### Editor-in-Chief

Prof. Dr. Luis Hernández-Callejo

Department of Agricultural and Forestry Engineering, University of Valladolid, Campus Duques de Soria, 42004 Soria, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science) and other databases.

#### Journal Rank:

JCR - Q1 (Geography) / CiteScore - Q1 (Urban Studies)
