

Special Issue

Community-Based and Urban-Scale Facility Management

Message from the Guest Editors

This Special Issue focuses on community-based facility management (CbFM) and urban-scale facility management as emerging approaches to managing the built environment at community, neighbourhood, district, and city levels. CbFM highlights the role of communities, participation, empowerment, local development, and social value. Urban FM expands this perspective by connecting citizens, public authorities, private actors, facility managers, and urban systems.

The purpose of this Special Issue is to advance theoretical, methodological, and empirical research on FM beyond the building scale. It welcomes studies on community facilities, urban services, public-private-people partnerships, smart and sustainable cities, urban heritage, regeneration, participatory governance, digital tools, and service-oriented approaches to sustainability. By doing so, this Special Issue will supplement existing urban studies literature by presenting FM as a service-based, process-oriented, and community-centred discipline for supporting sustainable and liveable urban environments.

About the Journal

Message from the Editor-in-Chief

Urban Science is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Luis Hernández-Callejo

Department of Agricultural and Forestry Engineering, University of Valladolid, Campus Duques de Soria, 42004 Soria, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science) and other databases.

Journal Rank:

JCR - Q1 (Geography) / CiteScore - Q2 (Urban Studies)
