Special Issue

Transit-Oriented Land Development and/or 15-Minute Cities

Message from the Guest Editor

We are pleased to invite submissions for a Special Issue focused on transit-oriented development (TOD) and 15min cities, two rapidly evolving paradigms in sustainable urban planning. This Issue aims to explore how integrated land use and transportation planning can create more livable, accessible, and equitable cities. The scope of the Issue includes, but is not limited to. planning practices, policy analysis, urban design, spatial data applications, infrastructure financing, mobility justice, and implementation challenges associated with TOD and 15-min neighborhoods. We welcome both theoretical contributions and empirical studies across different geographic and institutional contexts. This Special Issue seeks to bridge the gap between research and practice by examining how TOD and the 15-min city intersect with climate goals, housing affordability, and post-pandemic urban recovery. It will contribute to the existing literature by drawing connections between these two concepts, highlighting synergies and tensions, and offering policy-relevant insights. We look forward to your contributions that will help shape the discourse and practice of future urban forms.

About the Journal

Message from the Editor-in-Chief

Urban Science is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of "science" includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Luis Hernández-Callejo

Department of Agricultural and Forestry Engineering, University of Valladolid, Campus Duques de Soria, 42004 Soria, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science) and other databases.

Journal Rank:

JCR - Q1 (Geography) / CiteScore - Q1 (Urban Studies)
