

## Special Issue

# Urban Tourism and Hospitality Management: New Insights and Sustainable Approaches

### Message from the Guest Editors

Urban tourism is a complex and constantly changing phenomenon that reflects the interrelationships between the economic, social, cultural, and spatial dynamics of contemporary cities. In the context of increasing globalization, mobility, and digitization, cities are simultaneously becoming tourist destinations, spaces for consumption, and settings for innovation in hospitality. This Special Issue of Urban Science aims to explore, from an academic and multidisciplinary perspective, the multiple dimensions of urban tourism and hotel management, as well as their implications for urban planning, sustainability, and governance. This special issue considers both its opportunities for local development and its tensions in terms of environmental sustainability, social cohesion, and territorial balance. Contributions that examine, among other aspects, public policies and governance strategies for urban tourism; the integration of technological innovation into the tourist experience; the transformation of urban space and the identity of places; the challenges of sustainable hotel management and the impacts of tourism on the socioeconomic structure of cities are invited.

## About the Journal

### Message from the Editor-in-Chief

*Urban Science* is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the maximum length of the papers.
