

Special Issue

Sustainable Transformation in the Global South: Context-Driven Urban Design, Livelihoods and Development Challenges

Message from the Guest Editors

Dear colleagues The New Urban Agenda set out by United Nations in 2016 marks a clear direction of future research, especially in the discourse of urban planning, construction management, disaster management and resilience, etc. There is also an increasing realisation of the need to promote the exchange of knowledge and share best practices and experiences between North and South. The rise of the Global South has elevated geospatial discourse to new heights demanding new insights into peripheral urbanisation, overexploitation and so on.

Focusing on such vital development scenarios that characterise the Global South, this special issue aims to explore advanced and alternative theses around production and management of the sustainable built environment in the Global South. The issue will facilitate the generation of knowledge through innovative transdisciplinary approaches and alternative solutions to enable good governance, policy, regulations and so on, most importantly, emancipated voices and debates among global stakeholders of development in the South.

About the Journal

Message from the Editor-in-Chief

Urban Science is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Luis Hernández-Callejo

Department of Agricultural and Forestry Engineering, University of Valladolid, Campus Duques de Soria, 42004 Soria, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science) and other databases.

Journal Rank:

JCR - Q1 (Geography) / CiteScore - Q1 (Urban Studies)
