Deadline for manuscript submissions:

**closed (31 January 2025)**

### **Message from the Guest Editor**

Dear Colleagues,

This Special Issue welcomes high-quality papers regarding vaccine research, vaccination, and immunology. We encourage the submission of systematic reviews and/or meta-analyses that include the most recent research results and findings. A paragraph highlighting the research in context, including evidence before this study, the added value of this study, and potential implications of the results should be included in the cover letter.

Dr. Zixin Wang

The Netherlands

## Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

**Journal Rank:** JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Infectious Diseases)
