Deadline for manuscript submissions:
closed (31 January 2024)

Message from the Guest Editor

Dear Colleagues,

This Special Issue will focus on immunological mechanisms in order to understand the development of vaccines and their side effects at the cellular level. Papers which discuss vaccine sustainability for different diseases and their adoptive and innate immunity are welcome. Moreover, this Special Issue will contain an editorial choice, a conference abstract presentation, in silico studies, regular review and prospective review papers and research articles.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
