### Message from the Guest Editors

Dear Colleagues,

During Covid-19 pandemic, it is very important to submit reports on vaccine development. Vaccine development can include vaccines against viral diseases, dendritic cell vaccines against cancer or other diseases. In addition, this issue can involve recent development of new immunotherapies against cancer such as chimeric antigen receptor (CAR) T cells therapies, checkpoint inhibitors, monoclonal antibodies, bi-specific antibodies, and combination therapies. The reports on pre-clinical vaccine development, clinical trial data and reviews can be submitted to this issue.

Dr. Vita Golubovskaya  
*Guest Editor*

Deadline for manuscript  
submissions:

**closed (10 March 2021)**

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPLus / SciFinder**, and **other databases**.

**Journal Rank:** JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Pharmacology (medical))
