### **Message from the Guest Editor**

Dear Colleagues,

The prevention and control of vector-borne diseases is a priority for improving global health. Despite recent advances in this area, vaccines are not available for most vector-borne diseases that cause millions of deaths yearly. Integrated control using a One Health approach in which animal hosts of tick reservoir are vaccinated against the vector and the pathogen is required. This Special Issue will focus on recent developments for new effective vaccines against ectoparasite vectors and associated infectious and allergic diseases as well as challenges and approaches to be addressed.

Prof. Dr. Jose de la Fuente

## Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPus / SciFinder**, and **other databases**.

**Journal Rank:** JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
