Message from the Guest Editors

Dear Colleagues,

In light of the considerable amount of work carried out in the field of vaccine technologies over the last years, much is to be learnt from the recent experiences of many research groups in vaccine design and testing, which may constitute a valuable resource for the future.

We are pleased to invite you to contribute to this Special Issue of *Vaccines*, entitled “COVID-19 vaccine candidate development”.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: COVID-19 candidate vaccine design, construction and trials, and refinements or innovations regarding vaccine testing, both in animal models and in human clinical trials.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPus / SciFinder**, and **other databases**.

Journal Rank: JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
