Message from the Guest Editors

Dear Colleagues,

This is the 2nd special issue of “*Poultry Vaccines*”.

In this Special Issue, we still invite original research and review papers that address recent advances in the field of poultry vaccines either for viral, bacterial and parasitic diseases. Topics of interest include but are not limited to: poultry vaccine basic science, manufacturing, technology, safety, and efficacy. Both experimental or field animal trials are welcomed. Specific topics may include diagnostic strategies to differentiate infected from vaccinated animals, identification of vaccine molecular markers, engineered vaccine development (e.g., vectored vaccines) and novel vaccine delivery tools.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
