submissions:

31 October 2024

Message from the Guest Editors

Dear Colleagues,

Global health is continuously changing; thus, we are expecting to face various challenges in the form of epidemics and pandemics. Vaccines play an important role in mitigating these challenges. The worldwide effort to vaccinate people has demonstrated how immunization can prevent serious consequences, save lives, and protect communities. This Special Issue aims to investigate the evolving landscape of vaccination and explore solutions to achieve better vaccine uptake. We welcome original research, perspectives, and reviews that examine the latest advances in public health vaccination strategies, the role of vaccines in global health security, and ways to increase vaccination rates in vulnerable populations.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPLus / SciFinder**, and **other databases**.

Journal Rank: JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
