Deadline for manuscript submissions:

**closed (31 December 2023)**

### Message from the Guest Editor

This Special Issue focuses on recent research progress in the important clinical multiple infectious diseases in poultry and livestock, including immunosuppressive diseases, respiratory syndrome diseases, an gastrointestinal diseases. Additionally, the related detection and basic knowledge of physiology, biochemistry and pathogenic mechanisms are of great concern. Additionally, the development of scientific and standardized management models conducive to the healthy breeding of animals is also of great interest to us.

The research subjects of interest for this Special Issue include poultry, pigs, cattle, sheep, horses, etc. Furthermore, excellent research results outside of the above research scope are also welcome.

In this Special Issue, the original research articles and reviews are welcome. We encourage all scientists working in these fields to publish their experimental results and conceptual summaries in this Special Issue.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

**Journal Rank:** JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Infectious Diseases)
