Message from the Guest Editors

Dear Colleagues,

We are currently living in a post-vaccine era where historically known communicable and life-threatening infectious diseases are in under control by an effective immunization strategy. Researchers are utilizing post-marketing surveillance data to generate real-world data to promote vaccine safety.

This special issue titled as “Pharmacoepidemiology in vaccine: Generating the real-world data to promote vaccine safety and uptake” will introduce the readers of the Journal a pharmacoepidemiologic approach to address vaccine safety and hesitancy. Specifically, this issue encompasses the following areas of research:

- (1) identifying unsuspected AEFIs by applying novel statistical methods in post-marketing surveillance data;
- (2) conducting observational study for casual inference on the safety of vaccine(s);
- (3) describing interventions or strategies to combat vaccine hesitancy.

Manuscripts that address any of these research areas are welcome for submission.

Prof. Ju-Young Shin

Dr. Ju Hwan Kim

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
