Deadline for manuscript  
submissions:

**closed (31 May 2021)**

### **Message from the Guest Editor**

Dear Colleagues,

Emerging RNA viruses continue to pose a unique threat to global human health. This special issue seeks manuscripts that evaluate new approaches to develop vaccine technology in the field of emerging RNA viruses. These approaches can include basic proof-of-concept approaches for vaccine development, novel adjuvant approaches, immunology of vaccine approaches, and translational efforts to evaluate immunogenicity and efficacy of a vaccine approach for emerging RNA viruses. We are particularly interested in manuscripts that evaluate novel platforms for rapid vaccine development. A continued and persistent effort to develop novel vaccine candidates and approaches for a variety of RNA viruses will provide an important pipeline of data as new RNA viruses emerge and threaten global human health in the future.

Dr. David Beckham

## Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPLus / SciFinder**, and **other databases**.

**Journal Rank:** JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Pharmacology (medical))
