## **Viral Infections, Host Immunity and Vaccines**

Guest Editors:

### Dr. Salman L. Butt

Department of Population Medicine and Diagnostic Sciences, College of Veterinary Medicine, Cornell University, Ithaca, NY 14853, USA

## Dr. Henry Kariithi

Biotechnology Research Institute, Kenya Agricultural and Livestock Research Organization, Nairobi 00200, P.O. Box 57811, Kenya

Deadline for manuscript submissions:

28 February 2026

# **Message from the Guest Editors**

Dear Colleagues,

The outcome of virus infection and pathogenesis involves a complex virus—host interaction at the cellular level. Host restrictive factors limit viral replication, while viral proteins help the virus evade the host cell's immune response. This Special Issue of *Vaccines*, "Viral Infections, Host Immunity and Vaccines" provides a platform for research studies on virus—host interactions. This includes molecular studies using advanced technologies, in vitro models for virus—host cell interaction, and novel vaccine development platforms for viruses affecting humans and animals.

We welcome studies that develop and use in vitro models to understand virus-host cell interactions and invite studies that are focused on novel vaccine development platforms for viruses of both human and animal importance.

### Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine, University of Georgia, Athens, GA 30602-7387, USA

## **Message from the Editor-in-Chief**

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

## **Author Benefits**

**Open Access:** free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Pharmacology (medical))
