Deadline for manuscript submissions:

closed (31 January 2023)

## **Message from the Guest Editors**

As we known, sociological factors are one of the major determinants of vaccine uptakes. The affordable and easily accessible vaccines, and high vaccine confidence will increase the vaccination coverage. While some culture and rumors on vaccines, and vaccine hesitancy will sharply decrease the vaccines uptake. To achieve a more extensive understanding of recent scientific knowledge and current trends in sociological determinants of vaccination, this special issue is focused on the recent scientific and technical progresses made in this field. Based on your extensive knowledge and experience, we invite you to contribute with an original report, original observation or review, to highlight (i) determinants of vaccine uptake, (ii) interventions to improve the vaccine uptake, (iii) vaccine hesitancy, and (iv) recent advances in novel vaccine delivery systems.

## **Message from the Editor-in-Chief**

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

#### **Author Benefits**

**Open Access:**— free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
