Message from the Guest Editors

Dear Colleagues,

Vaccine-preventable diseases (VPD) occur endemic and epidemic and continue to impact the workforce's economy and health. Also, outbreaks often occur in specific work settings, such as hospitals, transport, construction sites, offices.

The objective of this Special Issue is disseminate original research, reviews and note on vaccine assessment and management for workers in order to evaluate present management and indicate the future solutions and predictor indicators.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
