Deadline for manuscript submissions:
closed (30 November 2022)

Message from the Guest Editors

Dear Colleagues,

The immune system's role in infection and cancer therapy has been on the spotlight of medical breakthrough for the past decade. The advent of immune checkpoint blockade therapy, the success of genetic engineered T cells in hematological malignancies or the record-breaking development and approval of COVID-19 vaccines are true feats of modern medicine. The dust from these aforementioned technological breakthroughs as yet to settle. We are striding towards completion of key trials that combine immunotherapy with other well-established treatment modalities. New mechanisms of action of these recently approved therapies keep being unveiled. Molecular fine-tuning, production scalability and the socio-economical impact of these new therapeutics are far from reaching maturity.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

Journal Rank: JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Pharmacology (medical))
