In this Special Issue of Vaccine, we focus on recent progresses made in the field of vaccinology, as well as future directions identified for solid organ transplant patients. Based on your extensive knowledge and experience, we invite you to contribute with an original report, personal point of view, or review to highlight (i) specific organization models proposed to improve vaccination rate in this population, (ii) immune pathways developed to improve immunogenicity of vaccines or alternative strategies for transplant recipients, (iii) future directions concerning the development of new vaccines.
