Deadline for manuscript
submissions:

closed (30 April 2024)

Message from the Guest Editor

This Special Issue focuses on identifying important gaps in psychological and behavioral responses, exclusively focusing on, *but not limited to*, COVID-19 vaccination. Since the Food and Drug Administration (FDA) gave its full *approval* of the first *COVID-19 vaccine*, there has been an exponential growth in the number of publications on *studies* assessing the psychological and behavioral responses to COVID-19 vaccination throughout the world. *Psychobehavioral* responses to COVID-19 vaccination differ in people from *specific cultures and countries*. There are huge variations in the *psychobehavioral* responses to COVID-19 vaccination between countries, and even within them. Despite the large number of publications, significant information *gaps still exist*. *Particularly, there has been a scarcity of studies conducted on neglected or marginalized populations.*

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPus / SciFinder**, and **other databases**.

Journal Rank: JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
