Deadline for manuscript  
submissions:

**closed (30 September 2021)**

### Message from the Guest Editor

Dear Colleagues,

The aim of this Special issue is to collect and showcase high-level research outputs in the field of digital health applied to vaccine-preventable disease control from a broad perspective. We value studies focusing on all components of immunisation programmes, from health education and communication, to the organisation and monitoring of immunisation services that consider the planning, use, and impact of digital solutions, including, but not limited to: digital information systems, social media, smartphone applications, decision support tools, mobile and geospatial technologies, artificial intelligence and big data. Special attention will be paid to innovative insights and multidisciplinary approaches to public health in the digital era, applied to the field of vaccine-preventable disease control.

We very much look forward to receiving your contributions.

Prof. Anna Odone

## Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPLus / SciFinder**, and **other databases**.

**Journal Rank:** JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Infectious Diseases)
