Message from the Guest Editors

We are pleased to announce the Special Issue “Challenges in the Development and Practical Application of Vaccines against Zoonoses”. This Special Issue is aimed at addressing bottlenecks for development and practical application of vaccines against zoonoses, with discussion of future countermeasures against them.

With this Special Issue, we aim to gather real-world reports on various challenges regarding the development and practical application of vaccines against zoonoses. This issue targets a variety of stakeholders, including experts involved in vaccine R&D, policy decision makers, immunization program managers, medical professionals, experts who conduct research on awareness and behaviors surrounding vaccination, as well as in other relevant scientific fields.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPLus / SciFinder**, and **other databases**.

Journal Rank: JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
