

## Special Issue

# Viral Vector-Based Vaccines and Therapeutics

### Message from the Guest Editor

This Special Issue invites contributions that explore the forefront of viral vector research in both vaccine and therapeutic applications. We seek original research, comprehensive reviews, case studies and perspective pieces that examine the design, development and deployment of viral vector-based solutions. The topics of interest include technological innovations, clinical trial results, safety and efficacy analyses, comparative studies and their impact on global health. We also welcome submissions on developing viral vectors for therapeutic purposes, addressing their potential in treating various diseases. Contributions should consider regulatory, ethical and public perception aspects to foster a multidisciplinary dialogue. This platform allows scholars and clinicians to share insights and propel advancements in viral vector-based vaccines and therapeutics. Join us in shaping the future of research and public health in this dynamic field.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
