

## Special Issue

# The 10th Anniversary of *Vaccines*—Vaccines against Emerging and Tropical Infectious Diseases

### Message from the Guest Editor

In recognition of this significant milestone, we are launching a Special Issue entitled “The 10th Anniversary of *Vaccines*—Vaccines against Emerging and Tropical Infectious Diseases”. This Special Issue will include high-quality papers on topics within the broad scope of *Vaccines*. We will consider manuscripts that investigate immunology and vaccinology against emerging and tropical infectious diseases, immunological responses to vaccine targets, novel approaches for vaccine development, novel vaccine delivery platforms, novel immunomodulatory adjuvants, role of innate immunity, immune correlates of vaccine efficacy, and evaluation of vaccines using animal models and humans. It is our pleasure to invite you to contribute an original research paper or a comprehensive review article for peer review and possible publication in *Vaccines*.

### Guest Editor

Prof. Dr. Nirbhay Kumar

Milken Institute School of Public Health, George Washington University,  
Washington, DC 20052, USA

### Deadline for manuscript submissions

closed (31 December 2023)

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Infectious Diseases)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.5 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
