Modulation of the Immune System in Inflammatory Diseases and Hidradenitis Suppurativa

Message from the Guest Editors

In inflammatory diseases, a disbalance of the immune system plays a decisive role. An increasing number of drugs, biologics, and vaccines are being developed to modulate the immune system. Many immunomodulators suppress proinflammatory cytokines and stabilise inflammatory diseases. For this Special Issue, entitled “Modulation of the Immune System in Inflammatory Diseases and Hidradenitis Suppurativa”, review articles, original articles, and larger case series from various specialities of rheumatology, dermatology, neurology, gastroenterology, endocrinology, virology, pharmacology, and oncology are welcome. Topics will include, but are not limited to, the following areas:

- Inflammatory diseases and potential immune system modulators;
- Newly discovered targets for drugs or vaccines in inflammatory diseases;
- New insights into the pathogenesis of inflammatory diseases;
- Potential adverse effects of immunomodulators or treatment response.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Department of Infectious Diseases, College of Veterinary Medicine,
University of Georgia, Athens, GA 30602-7387, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
