

Special Issue

Vaccines Safety during Emerging Infections and Issues of Special Populations and Minority Groups

Message from the Guest Editors

Objectives:

- How to communicate vaccine-related safety issues;
- Policy making and regulations related to vaccine safety;
- How to report vaccine-related pharmacovigilance;
- How to manage vaccine side effects and adverse reactions;
- Companies versus labs versus government communications regarding vaccine safety.

Examples of special populations: Elderly; infants; children; patients with genetic problems; patients with autism; pregnancy; patients with cancer; patients with disabilities; patients with organ damage; patients with comorbidities. **Targeted emerging infections:**

- SARS;
- COVID-19;
- Nipah virus;
- Dengue virus;
- Ebola virus;
- Zika virus;
- Hepatitis;
- Monkeypox virus.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Prof. Dr. Ger Rijkers

Roosevelt, 4331 CB Middelburg, The Netherlands

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
