

Special Issue

Infectious Diseases, Epidemiology and Vaccination

Message from the Guest Editors

Dear colleagues, We strongly believe that this model could be successfully replicated for many infectious diseases, and we emphasize the importance of the multidisciplinary and strategic collaborative effort in hazard identification; in the application of prevention and control measures in both occupational and public health settings; and in the control of appropriate use of antibiotics, screening, and active surveillance of infected subjects. Therefore, authors are invited to submit their latest research regarding emerging infectious agents and the latest developments in vaccines, vaccine technology, and vaccination practices. Additionally, we would like to dedicate a section of this Special Issue to hospital infections and major infective agents regarding healthcare workers.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
