Virus Pandemics and Vaccinations

Message from the Guest Editors

While the COVID-19 pandemic is far from being really over, new health threats are continuously emerging, particularly from the interface between human beings, animals, insects, and the ever-changing environmental landscape of the post-globalization world. In such a setting, not only new and effective vaccine strategies targeting both “ancient” (e.g., pox, measles, and influenza) and invasive pathogens (e.g., zika and dengue) are required, but also new vaccination strategies focusing on humans and animals, from the perspective of the One Health approach. Moreover, in such a context, vaccine hesitancy threatens achieving adequate vaccination coverage worldwide. The present SI will, therefore, welcome observational and interventional studies, along with systematic reviews and meta-analyses, addressing the topics of vaccines, vaccination strategies, emerging pathogens, infection control, and vaccine hesitancy.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
