

## Special Issue

# Safety and Efficacy of the SARS-CoV-2 Vaccine in Cancer Patients

### Message from the Guest Editor

Dear Colleagues, As guest editor, I am pleased to announce this Special Issue, entitled “Safety and Efficacy of SARS-CoV-2 Vaccine in Cancer Patients”. Studies related to the safety and efficacy of existing Covid-19 vaccines in cancer patients have not been widely conducted, and significant uncertainties remain about the safety of the vaccine and immunogenicity in this group. In light of this, the current issue will be devoted to discussing the opportunities and challenges related to vaccination in cancer patients.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.
