

# Special Issue

## T Cells and Vaccine Immunity

### Message from the Guest Editors

Dear colleagues, We would like to invite you to contribute to this Special Issue by submitting an original article, observation, or review relevant to this topic. Among others, we would be keen to receive submissions that:

- Identify T-cell epitopes through next-generation technologies;
- Define the mechanisms of protection related to vaccine-induced cellular immunity;
- Illustrate T-cell-inducing vaccine strategies using vectors or other platforms (nanotechnology, dendritic cell targeting) to effectively deliver antigens

We look forward to your contribution.

---

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
