

Special Issue

Immunization Strategies for Animal Health: 2nd Edition

Message from the Guest Editors

Understanding the immunology of infectious disease pathogens is the key to driving control strategies. Currently, novel technologies based on molecular biology make it possible to develop several kinds of vaccines to enable the onset of rapid and effective immune responses. We are pleased to invite you to submit research articles examining current research in **immunization strategies for infectious diseases relevant to animal health, including zoonoses**. This Special Issue aims to present articles on **vaccine immunogenicity, efficacy, and screening methods to test vaccines**. Review articles are also welcome.

Keywords:

- vaccine immunology
- virus
- emerging infectious diseases
- animal health
- public health
- vaccination

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
