

## Special Issue

# Porcine Vaccines: Enhancing Health, Productivity, and Welfare

### Message from the Guest Editor

We are delighted to invite you to submit your next publication to the journal *Vaccines* for a Special Issue entitled “Porcine Vaccines: Enhancing Health, Productivity, and Welfare”. Porcine reproductive and respiratory syndrome, porcine viral diarrhea, African swine fever, circovirus-related diseases, and others, seriously harm and restrict the healthy development of the pig industry. In recent years, many variants of porcine viruses have emerged and immunologically escaped from the current available vaccines, causing new challenges in the prevention of porcine diseases and required the updating of existing vaccines, antigens, or adjuvants. DIVA vaccines, multivalent vaccines, and antigen-precise-designed vaccines are the focus of current porcine vaccine research. In addition, oral, spray, and other needle-free vaccination delivery methods have seen strong demand for animal disease control in the future.

This Special Issue will focus on porcine vaccines, including vaccine design, development, effect evaluation, small-animal replacement models, DIVA, vaccination delivery methods, and so on. Original research articles, and comprehensive reviews are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
