

## Special Issue

# Vaccine and Vaccination in Veterinary Medicine

### Message from the Guest Editors

This Special Issue is a platform for disseminating cutting-edge research that bridges fundamental science and practical applications. We invite contributions in novel vaccine platforms (e.g., mRNA, viral vectors), mucosal immunization strategies, or cross-species immunity studies. We welcome original research articles, short communications, and reviews. Research areas include, but are not limited to, the following:

- Vaccine safety and efficacy;
- Establishment of infectious disease models in animals;
- Development and design of novel or improved vaccines;
- Differential diagnostics between vaccine administration and pathogen infection;
- Therapeutic vaccines and vaccines for economic animals (e.g., foxes, deer, etc.);
- Determining the relationship between veterinary vaccines and human health;
- Vaccines and diagnostics for aquatic animals.

---

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
