

## Special Issue

# Vaccination for Patients with Respiratory Diseases

### Message from the Guest Editors

Respiratory diseases are common medical disorders worldwide. One of the classic clinical features of chronic respiratory diseases is exacerbation, which viral and bacterial infections can trigger. Preventing infections through vaccinations is an important way to prevent exacerbation of chronic respiratory diseases linked to adverse outcomes. We are pleased to invite you to submit articles on vaccination in patients with respiratory diseases. In this Special Issue, we welcome original research articles and reviews are welcome. Research areas may include, but are not limited to, the following: asthma, COPD, bronchiectasis, interstitial lung disease and vaccines.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
