

## Special Issue

# Strategies for Vaccination, Immunological Insights, Healthcare Advances, and Economic Outcomes in Health

### Message from the Guest Editor

Vaccination is essential for protecting public health by preventing infectious diseases and reducing the burden on healthcare systems. Effective vaccination strategies are complex and influenced by factors such as immunological mechanisms, access to healthcare, and economic considerations. This Special Issue aims to explore these facets, focusing on both immunological outcomes and the role of healthcare systems. We invite contributions on the following key areas: vaccination strategies, immunological perspectives, and mechanisms of vaccination, including efficacy, safety, long-term immunity, and population immunity across demographics, as well as the impact of vaccination on health outcomes.

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
