

Special Issue

Vaccination Hesitancy across the Globe

Message from the Guest Editors

We are pleased to invite you to contribute to a Special Issue dealing with vaccine hesitancy across the globe. Although vaccines have been shown to be one of the most effective primary prevention methods, there are various barriers to vaccine compliance. These barriers are often influenced by the type of vaccine and the social, environmental, and cultural characteristics of the target population. This Special Issue is dedicated to studies dealing with vaccine hesitancy and vaccine compliance across the globe. We will be happy to offer article processing fee (APC) discounts for high-quality and -impact research papers. Best regards,

Guest Editors

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp
