

## Special Issue

# Vaccination Hesitancy across the Globe

### Message from the Guest Editors

We are pleased to invite you to contribute to a Special Issue dealing with vaccine hesitancy across the globe. Although vaccines have been shown to be one of the most effective primary prevention methods, there are various barriers to vaccine compliance. These barriers are often influenced by the type of vaccine and the social, environmental, and cultural characteristics of the target population. This Special Issue is dedicated to studies dealing with vaccine hesitancy and vaccine compliance across the globe. We will be happy to offer article processing fee (APC) discounts for high-quality and -impact research papers. Best regards,

---

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Infectious Diseases)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
