

## Special Issue

# Vaccines and Immune-Modulators for Mammalian Livestock Species

### Message from the Guest Editor

Veterinary vaccines are crucial for maintaining animal health, ensuring animal welfare, promoting food production, and safeguarding public health. Most veterinary vaccines currently in use in livestock, including against toxins of pathogens, are inactivated vaccines, live-attenuated vaccines, or subunit vaccines. This Special Issue will collect original research articles and review articles on the following topics

**-vaccines for mammalian species considered livestock in Europe, including horses (but no model species such as rodents);**

**-vaccines and approaches not only against infectious diseases but also cancer, allergies or autoimmune diseases;**

**-developing new vaccines or improve existing vaccines, including adjuvants and immune-modulators.**

**We also warmly welcome articles to related topics, such as the companion animal sector.**

We invite original research articles and review articles in the context of recent advancements and ongoing research in vaccines and immune-modulators for mammalian livestock species.

---

### Guest Editor

Prof. Dr. Falko Steinbach

School of Veterinary Medicine, University of Surrey, Guildford GU2 7AL, UK

## About the Journal

### Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /  
CiteScore - Q1 (Pharmacology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
