Factors That Contribute to Vaccine Hesitancy towards COVID-19 Vaccination

Message from the Guest Editor

Vaccinations save lives, but many people remain hesitant to get vaccinated against COVID-19 through fear of side effects. Increasing vaccine knowledge is therefore vital for a successful COVID-19 vaccine rollout. Understanding the reasons for vaccine hesitancy and the benefits of vaccination in disease prevention is necessary. Unvaccinated individuals have higher rates of hospitalization and COVID-19-related morbidity and mortality. We invite you to submit original research articles or reviews to this Special Issue exploring the factors that contribute to hesitancy toward COVID-19 vaccination and the consequences of non-vaccination. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2025).
