Vaccines and Other Prophylactic Interventions Against H5N1 Influenza Viruses

Message from the Guest Editors

In this Special Issue, entitled “Vaccines and Other Prophylactic Interventions Against H5N1 Influenza Viruses”, we welcome submissions of original research, reviews, clinical trials, and opinion articles that shed light on the latest advances in the field of vaccines and other prophylactic interventions against HPAIV H5N1, with a particular emphasis on the following:

- Protection/efficacy of current vaccines;
- Generation of safe, immunogenic, and protective new vaccine candidates;
- Environmental and other factors affecting effectiveness of vaccines;
- Limitations of influenza vaccination;
- Vaccine adjuvants and immunomodulators;
- Evaluation of vaccine efficacy;
- Vaccine delivery methods and strategies;
- Early implementation of prevention policies.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.
